

# SERVICE-FACTSHEET SCUDERIA HANSEAT

## Tire service and Dunlop ranking in the legendary driver training: Dunlop the official tire partner

In the Scuderia Hanseat's autumn 2008 event, Dunlop is involved as official tire partner and provides a unique service. For those who are going to place their order in time, the tires will be delivered at the Nürburgring. Furthermore, there will be special prices including free fitting service for sports drivers.

### Service to be topped off

With the co-operation with Dunlop, the already good service in the Scuderia's legendary driver training is topped off. After all, the Hanau based brand provides a full-service package for ordered tires, comprising advice, shipping

and fitting. Furthermore, there will be a special ranking for all the drivers contesting the event on tires with the striking 'Flying D' on their sides, with the best of them being rewarded with a set of Dunlop tires. Incidentally, the contacts in the 'Motorsport Truck' are ready to also support every entrant and unbureaucratically execute the tire service for third-party products.

**Please use the form on the backside for your registration.**

### Successes on Dunlop:

## At home in tuning and leisure sport

Dunlop is a partner of the racy and ambitious motorists. And this does not only apply to the Scuderia Hanseat's event at the Nürburgring Nordschleife alone. At the same time, Dunlop also is truly big in the high-level tuning sector. The latest success: in the 'sport auto Tuner Grand Prix', professional racing driver Marc Basseng finished runner-up, with his Cargraphic-Porsche 997 Turbo GT RSC 3.6. On the way to this success – on the Dunlop SP Sport Maxx GT that has been designed for the use in the day-to-day traffic too – he clocked a lap time nearly two seconds faster than his 2007 winner time. In the end, the

only driver who defeated him was the winner who relied on purebred sports tires. The fine third place was secured by Thomas Neuert, an extremely fast motor-racing amateur. He contested the Tuner Grand Prix at the wheel of a Porsche 997 GT3 RSC 4.0 and defeated quite a number of turbo powered top-class sports cars, with his naturally aspirated vehicle. In the Scuderia Hanseat he also opted for the Dunlop SP Sport Maxx GT and was truly successful. In the final examination of the 2008 springtime training he proved too be the best, with his Porsche GT3 RS (picture to the left, below) – thus being the first Porsche winner since 1996.

## Perfect tires for every requirement

No matter if on the Nürburgring's Nordschleife or in the day-to-day traffic: Dunlop features a wide range of tires perfectly tailored to the requirements of drivers preferring a racy style of driving. And the top products of this range are bearing a joint name: Dunlop SP Sport Maxx. In its racing version, it is the exclusive tire of the most popular international touring car series: in DTM, every driver relies on an exclusive spec of the Dunlop SP Sport Maxx.

### Maxx performance for sports drivers

The experiences gathered in tuning, motor-racing and the day-to-day traffic were concentrated to design the Dunlop SP Sport Maxx GT, a tire for the drivers of sports cars and high-performance saloons. It stands for extremely good handling in dry conditions, excellent top-speed stability – even beyond 300kph – and successes in events such as the Tuner Grand Prix and the Scuderia Hanseat. Nonetheless, Dunlop also has got the perfect product for those who want to equip their mid-size cars with particularly racy tires. After all, the basic spec of the Dunlop SP Sport Maxx and the Dunlop SP Sport Maxx TT launched only this year perfectly combine raciness and suitability for daily use: high-tech tires for the demanding motorist.

### Detailed information in the World Wide Web

Tires of the Sport Maxx family are available in numerous dimensions. For detailed product information and all the dimensions available please visit [www.dunlop-tires.com](http://www.dunlop-tires.com). By dint of the form on the backside, you also can fall back on the knowledge of the Dunlop tuning and motor-racing experts.
